

## Company Overview

### About DATANET.CO.UK

With 12 years experience in supplying businesses with best in class Internet connectivity and hosting services, Datanet is ideally placed to provide your company with expert advice, support and solutions.

Our new datacentre in Fleet has been designed to supply a higher power allowance in an energy and cost efficient manner and, combined with our London datacentres, forms our core infrastructure and allows us to expand our portfolio. With secure hosting, dedicated IP connections and business continuity suites, Datanet is a recognised name you can rely upon to help your business develop and grow.

### Our Solutions allow your business to:

- Connect applications, data, voice and video over our Business Class IP Network.
- Connect geographically separate locations and home workers to a central network.
- Share business critical applications between different locations.
- Increase the security of company data by hosting servers in dedicated facilities.
- Develop a flexible, high availability hosting function through the use of virtualisation.
- Satisfy insurance and professional trade association requirements by developing your DR/BCM plan based at our Fleet datacentre.

### Business Critical Hosting

With our very own datacentre ideally located along the M3/M4 corridor, just 20 miles outside London, Datanet are able to offer a wide range of hosting services including co-location, dedicated servers and virtualised hosting from our Multi Fibre POP.

### Award Winning Connectivity

Datanet's connectivity solutions are designed to provide businesses with secure, high speed internet and inter-site access and reliability, all combined with our award winning customer service and support which has resulted in multiple ISPA awards and nominations. Whether it is for a single office connection or part of a large multi-site solution, Datanet's connectivity options are flexible, reliable and of the highest quality.

### A Complete Package

Datanet go beyond just hosting and connectivity, backing up these services with business class technical support and consultancy, in addition to a complete range of ISP services. We also offer the added bonus of access to our Business Continuity suites in case of emergency.

### Datanet Support

Datanet take great pride in the high quality of our technical support staff, along with our getting it right first time philosophy; our technical staff provide ongoing assistance in a responsive and friendly manner. Customers benefit from 24/7 technical support for all our hosting and private circuit connectivity solutions and we answer all calls within 4 rings.

### Consultancy

Datanet also offer expert advice and consultancy on IP projects and solutions that work for your business. Consultancy is provided at the highest quality from the initial conversations through to post implementation service and support.

### ISP Services

Datanet's solutions include all the standard and peripheral Internet services you would expect from an award winning, Business Class Solutions provider. This means that all supporting elements (IPs, Domain Names, and Email Options etc.) can be included in the main business solution.

### Business Continuity/Disaster Recovery

Available as part of a complete solution, Datanet also have two business continuity suites to enable you to use our offices in the event that your own are inaccessible. With your vital data and applications hosted in our datacentre, we are able to give you access to these, together with phones, PC's etc, allowing you to continue working almost as if you were in your own office.

### Datanet's Promise

To dedicate our time and attention to finding, delivering and supporting the right Hosting and Connectivity Solution for your business.
